

changeday

a platform for long term change

16 march 2016

changeday is a people
led, accessible and energetic social
movement for better health outcomes.

It's easy to get caught up believing that change needs to start somewhere else. We can end up waiting for someone else to 'fix' things or waiting for someone to give us permission to be amazing, or even just to do what we know needs to be done.

Don't wait any longer! Wherever you are and whatever your role is in health and community care: you can make a difference. Together our potential is enormous.

Visit **changeday.com.au** and let us know the one thing you are going to do differently. Ask your organisation or service to join you.

Change Day is system change in action. Remember what Margaret Mead said about small groups of people changing the world? Well this is your chance to be that change.
